

ABSTRACT OF THE DISCLOSURE

LABELING REAGENTS AND LABELED TARGETS, TARGET LABELING
PROCESSES AND OTHER PROCESSES FOR USING SAME IN NUCLEIC ACID
DETERMINATIONS AND ANALYSES

This invention provides for labeling reagents, labeled targets and processes for preparing labeling reagents. The labeling reagents can take the form of cyanine dyes, xanthene dyes, porphyrin dyes, coumarin dyes or composite dyes. These labeling reagents are useful for labeling probes or targets, including nucleic acids and proteins. These reagents can be usefully applied to protein and nucleic acid probe based assays. They are also applicable to real-time detection processes.
